## EXPERIENCE

---

03/2026 – Present

### Software Developer – Internship @ CERN

Development of the PMF web application:

- Built a full-stack web app to centralize project management workflows, replacing outdated legacy processes.
- Designed the application's relational database from scratch, utilizing an ORM for type-safe queries and seamless migrations.
- Automated the platform's scalable deployments designing the entire CI/CD pipeline.

Tech Stack: Next.js, TypeScript, Tailwind CSS, PostgreSQL, Prisma, GitLab CI/CD, Docker, OpenShift, Figma

2020 – Present

### Web Developer – Independent

Development of web solutions for local businesses, focusing on modernizing their digital presence:

- Deployed responsive landing pages and blogs, managing the full development lifecycle from concept to hosting.
- Collaborated with non-technical clients to translate requirements into functional web applications.
- Optimized site performance and SEO.

Tech Stack: HTML5, CSS3, JavaScript, Astro, Bootstrap, WordPress, Figma

## PROJECTS

---

2021 – 2025

### Lamentis Network

Custom website for a Minecraft community, visualizing game statistics via REST API integration with a focus on user-friendly interfaces.

Tech Stack: Next.js, CSS Modules, Figma

## EDUCATION

---

2023 – Present

### B.Sc. in Computer Science

Università degli Studi di Milano

01/2022 – 06/2022

### International Exchange Semester

Walnut Grove Secondary School, Langley, Canada
